DETAILED ACTION

In light of the newly found art to Scott, applicants' arguments are rendered moot and new rejections follow. Delay in applying this new reference is regretted.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,4,18,21, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scott (3998195).

Scott shows feed passages (figure 2) 34 extending into manifold 20, 22. The passages are round and because they round and end at an oblique angle, the opening will be elliptical. While the number of cylinder ports is not set forth, the use of four and six cylinder engines are notoriously old and to have at least four cylinders in Scott for power and smoothness would have been obvious to one of ordinary skill in the art.

NOTE, claim 21 is redundant and should be canceled.

Allowable Subject Matter

Claims 8-17, 19, 20, and 26 are allowed.

Claims 2,5-7,22,23,25, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
